INSTALLATION SPECIFICATIONS

- ① Extraction ducting upwards or to the rear.
- ② Cut-out for ventilation hoods with hard-wired connection rather than a plug.

INSTALLATION SPECIFICATIONS Mounting Details

- Center unit over cooking surface
- Distances "S" is determined by the cooking surface. See "Distance between cooktop and hood (S)" dimensions.
- If studs are not available in the required locations, a plywood backing (min. 1/2" (13 mm)) **MUST** be used to reinforce support. Reinforcing material should be affixed to structural wall members. Failure to adequately support the weight as stated may result in the ventilation system falling off the wall, causing personal injury and property damage.
